

**GOVERNMENT DOCUMENTS SECTION
REPORT
APRIL 8, 2000**

The Government Documents Section submitted two program proposals for the October 2000 Tri-Conference in Omaha. One proposal was for our annual membership meeting.

Because of the importance of census data about states and metropolitan areas to the allocation of federal government funds, the Government Documents Section has proposed a program for the Triconference presented by the Public Information Officer of the Census Bureau's Denver Regional Office. Census 2000 data is scheduled to be released sometime in December, so this will be a very timely demonstration of how information from the census will be accessible to libraries and the public. It should be of interest to all types of libraries and librarians.
